Liver Tonic

Heprosol

Liver Tonic

For Healthy Liver

Heprosol is a combination of lipotropic agents that helps in proper utilization, transport and metabolism of fat. Triglycerides from metabolized free fatty acid in the liver may be stored within hepatocytes if there is imbalance between uptake, transport and metabolism of fats with in animal body. Without significant supply of lipotropic compounds during this period, fats may accumulate in the liver which may cause severe problems affecting liver functions.

Composition/L

Choline Chloride	200.0 g	Sorbitol	70.0 g
Betaine	10.0 g	Vitamin B5	20.0 g
Inositol	5.1 g	Vitamin B12	5.0 mg
L-Carnitine	25.0 g	Biotin	5.0 mg
Lysine	10.0 g	Selenium	50.0 mg
Methionine Activity (MHA)	30.0 g		

Indications:

- Necessary for the maintenance of healthy liver function.
