

# IZOVAC LASOTA

---

## **FREEZE-DRIED LIVE VACCINE AGAINST NEWCASTLE DISEASE**

### **COMPOSITION :**

Each dose of vaccine contains :

Live attenuated Newcastle Disease Virus, strain Lasota :  $10^6$  EID<sub>50</sub> in stabilizing solution.

### **INDICATIONS :**

The vaccine is recommended for booster vaccination against Newcastle Disease.

### **DOSAGE AND ADMINISTRATION :**

Administer via drinking water. The vaccine is administered at 21-28 days of age and then every 2-3 months in layers or breeders. The vaccine Izovac B1 Hitchner or Izovac Clone must be administered at 1 day of age as first vaccination. The amount of water changes according to the age or season.

### **WARNINGS :**

- ☞ Suspend 2-3 hours before vaccination the administration of drinking water, in order to make the birds partially thirsty
- ☞ Control that the troughs are empty, clean and in particular that they do not contain residues of poultry feed, faeces or traces of disinfectants
- ☞ After determining the number of birds to be vaccinated prepare in clean containers (without disinfectants) the quantity of water to be drunk necessary for the administration of the vaccine
- ☞ All the birds should have the access to drinkers at the same time
- ☞ The reconstitution of the vaccine, the final dilution in the drinking water and the administration must be effected in the shortest time
- ☞ The drinking water containing the vaccine must be exhausted in a period ranging from 2 to 4 hours
- ☞ Do not expose the water containing the vaccine to heat sources (incubating lamps, sun and so on) or to intense light
- ☞ Use water not containing chlorine/traces or disinfectants
- ☞ Skim milk powder may be added to the water (2-3 grams per litre)

**STORAGE :** Store at +2/+8°C.

**EXPIRY TIME :** 2 years.

### **PACKING :**

Box containing 10 vials of 1000 doses.

**For Veterinary Use Only**
